New Enterprise. The Manhattan Library Company, of New York is offering to the city of Chillicothe a grand opportunity that is not likely to get again. Their general manager of the western cities is in town endeavoring to establish a City Library, affording each member for the small sum of \$1.50, free access to the library four years without any additional expense. It is a long felt want—that is supplied, and an offer solution to the problem how to obtain cheap reading and other rapid acceptance by the western cities of the Manhattan Library Company's proposition place the whole question beyond the experimental stage. It is a settled question that every town is benefited and made richer in proportion to the library advantages offered it and we hope this will meet a rapid demand of the citizens of Chillicothe.

"Uncle Jimmy" Scott. The great majority of human toil see the morning of life, but our subject luffed with the world's battles, almost by the routing of three sons and eighteen years. Born in Jefferson county, Ohio, and being blessed with a strong constitution, Mr. Scott grew to manhood. On an adventurous disposition, he emigrated to Indiana, thence to Illinois, and from there to Iowa, where he enjoyed frontier life near Mount Pleasant for several years. We next find him in the lead regions of Iowa and Wisconsin, making money in the mines, with an occasional successful barter with the Indians. He came and the gold excitement on the slope continued. Leaving his family behind, except his son Thomas, he plunged into the great American plains, he was successful in securing a large tract of land, and was one of the first to settle on the slope. He was made with oxen, and was free from the attacks of the red skins, save once when he, what is now the State of Nevada. Here the little band were surrounded by hostile Indians. On a pepper box revolver and an old gun were their means of defense. Hooding and yelling like devils the enemy closed near to their human prey. Our travelers expected instant death, but happily a large emigrant train drove by, whereupon the savages retreated to their tents. Three years of toil in the gold mines of California prepared father and son for new and thrilling scenes. Shipping from "Prizes" they sailed for Australia in company with a large party, all bound for the then new colonies of the South Pacific. After a long and tedious voyage, they arrived at a cross-grained settlement, where several tried to ground the vessel, and were dragged from the vessel. The vessel was then taken to a safe anchorage, and the passengers were landed. The vessel was then taken to a safe anchorage, and the passengers were landed.
